

Bryce Spaulding

Junior Cloud Infrastructure Engineer

(208) 450-2928

Idaho@mail.com

Idaho Falls, Idaho 83401

CAREER OBJECTIVE

To be of the most down to earth people you'll meet. Super easy going with the ability to work through tough dialogue. My goal is to transition into a more technical role like a Cloud Infrastructure Engineer where I can apply skills that I have learned outside of work.

SKILLS

Jenkins CI

Continuous Deployment

Cloud Computing

Disaster Recovery Planning

Compliance with Security Requirements

Version Control Systems

Atlassian JIRA

Agile Work Processes

EXPERIENCE

IT AUDITOR, Idaho Falls, ID

Pax8, May 2023-Present

- Developed audit plans and programs, assessed internal controls and identified areas of risk.
- Assisted with rolling out identity access management platform, Zilla Security. Worked on integration with 3rd party applications and end user training material.
- Lead cross department collaboration to build ISO 27001 metrics executive dashboard.
- Coordinated internal audits aligned with SOC 2, and ISO 27001.
- Utilized the Apptega compliance platform to create vendor risk assessments and track internal audits.

INTERNAL IT AUDITOR, Idaho Falls, ID

Coretek, June 2022-Present

- Collaborated with external auditors during annual reviews of SOC 2, ISO27001, CMMC, HITRUST by providing requested support materials.
- Audited variety of internal documents, procedures and reports against SOC 2, ISO27001, CMMC, and HITRUST standards.
- Documented detailed plans in ServiceNow outlining steps necessary for successful completion of projects from start to finish.
- Completed risk assessments in ServiceNow for assigned business functions to provide input into annual audit plan.
- Assisted with Vendor Risk Assessment reviews for new and existing vendors.

INFORMATION SECURITY CONSULTANT, Idaho Falls, ID

Prescient Security, November 2021-September 2023

- Configured AWS security groups, intrusion prevention systems, antivirus software, authentication systems and other security related technologies.
- Conducted vulnerability scans on networks to identify areas of improvement in security posture.
- Provided technical guidance to ensure compliance with regulatory requirements such as SOC 2, ISO 27001, HIPAA, and HITRUST.
- Identified gaps in existing processes and procedures that could lead to a breach in information security.
- Developed and implemented security policies to protect the organization's data assets from unauthorized access or malicious attack.
- Assisted in developing disaster recovery plans for critical systems in case of an emergency.
